ON THE ROAD!

[Visit us at the 19th Annual National Forum on Quality Improvement in Health Care](#)

Booth #1107
Orlando World Center
Marriott
December 9-12, 2007

This information-packed webinar is offered free of charge. It is presented by clinicians for clinicians and brought to you by Medical Automation Systems and Medical Decisions Network.

“Keys to Managing Glucose Management How to Build a Stronger Glucose Management Program in Your Hospital

This **FREE Live Webinar**, presented by clinicians for clinicians, is a must for anyone involved in hospital glucose management. **In one hour, you will learn:**

- The essentials for improving glucose management and optimizing patient outcomes, staffing resources and costs.
- The steps involved in establishing and maintaining a Glucose Management team.
- How computerized IV Insulin dosing can provide significant benefits to your glycemic control program.
- How harnessing the power of your hospital's data can improve your quality and performance.

Wednesday	November 28	1:00PM	Register >
Tuesday	December 18	2:00PM	Register >

*All times are Eastern Time

Just for attending one of these webinars, you'll receive:

“The Case for Tightly Controlled Glucose”

The studies supporting controlled patient glucose levels are overwhelming: Well-managed intensive inpatient insulin therapy in the hospital reduces mortality, infection, sepsis, neurologic events, the need for dialysis and transfusion, and costly length of stay. “The Case for Tightly Controlled Glucose” provides a sampling of some of the most compelling research, and is a powerful way to illustrate to your colleagues the reasons why hospitals everywhere are making Glucose Management a priority.

About the Presenters:

Dr. Gary Stouder is a board certified family physician from Greenfield, IN with an inpatient and outpatient practice limited to diabetes.

Alisa Domb, RN, is currently the Data Coordinator for John C. Lincoln North Mountain Intensive Care and Cardiovascular Intensive Care units, and has been involved in both Grant and pharmaceutical funded clinical research, for the last 10 + years.

Hundreds of your colleagues have found enormous value in the material presented in this Webinar which is a must for Critical Care Nurses and Directors, Endocrinologists, Diabetes Educators, Quality Managers, Intensivists, Pharmacists, Outcomes Specialists, and Infection Control Specialists.
